HIGH QUALITY MACHINED PRODUCTS MADE IN THE CENTER OF THE USA

About BHE

Since 1974, Blackhawk Engineering, Inc. (BHE) has been providing value added services to original equipment manufacturers. Our company is continually expanding and diversifying our product offerings to meet future needs.

Key Facts

- Privately owned and serving industry for 40 years
- Debt free including buildings and machinery
- ISO 9001:2008 approved
- 120,000 sq. foot plant with recent addition
- Larger part machining from 20 to 7000 lbs.
- DEA CMM measuring equipment, SPC, PPAP, FIA offered
- Fully staffed in house engineering and tool/fixture design
- Supported by excellent highway system and airport
- Fully EDI capable
- Room for your business!

The BHE Value

Long Term Total Value

Blackhawk Engineering, Inc. adds long term value by partnering with our customers' at any stage in their process, providing solutions from the product development phase to customized full production. By always applying the best technology and through employee training, we continually position ourselves to deliver value to customers in need of a long term competitive advantage.

Providing value to our customers begins at the quoting phase where we consider opportunities to optimize the manufacturability of the product to positively impact quality, delivery and cost. We then add additional value by streamlining the material flow by our ability to source, manage materials and coordinate any additional processes.

Working with BHE

Close communication with our customers is critical to any partnerships success. We seek to fully understand customers' needs and provide solutions to both short and long term objectives. Our effective communication coincides with our flexible scheduling to quickly react to product demand changes. Our goal is to work seamlessly within the complete supply chain to always deliver quality products at the right time to our customers.

Markets We Serve

Agriculture

- Suspension and power-train components
- Gear cases and housings
- Engine blocks, heads and exhaust manifolds
- Engine components
- Fuel/fluid power manifold blocks and components

Commercial Transportation

- Suspension and power-train components
- Cases, covers, housings and intake/exhaust manifolds
- Main bearing caps, thrust collars and counterweights
- Transmission/drive shafts, drive pinions, sleeves, couplings and hubs
- Light assembly and machining of rocker arms and idler shafts

Heavy Off-Road Equipment

- Armored transportation components
- All-terrain mobility vehicle systems, drivetrain and chassis applications
- Hydraulic and fluid power delivery
- Cases, covers, housings and intake/exhaust manifolds

Industrial Equipment/Energy

- Gear cases, covers and housings
- Shafts and motion components
- Fluid manifold blocks and components
- Brackets, weldments and guides
- Hubs, couplings and sleeves
- Light assembly

Power Transmissions Pump/Valve

- Pumps
- Generators
- Housings, covers and sleeves
- Gear cases and differentials
- Manifold Blocks
